

**NOTES**

1. Dimension can be reduced if swept path analysis is provided.
2. Turning heads will be required on roads where vehicles would otherwise have to reverse further than 12m.
3. Swept path envelopes will be required to include for wing mirrors to ensure vehicles have adequate space to undertake movements without putting pedestrians in danger, damaging highway infrastructure, or coming into conflict with other vehicles.
4. The swept path analysis is to confirm the largest vehicle expected to use it on a regular basis can make a three point turn manoeuvre. (refuse lorry).
