Future Home Standard

Off-Gas Grid Phase Out

GRADUAL RAMP-UP TO 2030 NET ZERO SCENARIO

SHORT TERM (1 YEAR)

MEDIUM TERM (1-3 YEAR)

LONG TERM (3+ YEAR)

ACCELERATING CONSUMER DEMAND

Prioritisation strategy to concentrate efforts on the vulnerable and difficult to retrofit properties

Linking private and community finance mechanisms with local installers to accelerate the roll out of energy efficiency and low carbon heating system

Local awareness campaigns to promote the benefits & reduce concerns around energy efficiency measures and low carbon heating

Prioritise bringing through a new generation of low carbon and insulation installers by leveraging the network of colleges and universities

BUILDING A FUTURE INSTALLER BASE

Leverage both national and local skills development programmes to upskill the existing network of gas engineers and insulation providers

Incentivise specialist training providers to expand their course provision through closer ties with industry to increase trainee throughout

Facilitate knowledge sharing between local authorities, the installer base and training providers to share best practice and minimise duplication of effort

MAKING TRAINING & CERTIFICATION ATTRACTIVE

Actively promote relevant training courses to local installers to reduce the search cost burden and tackle perceived risks in engaging in training

Encourage local installers to be accredited in order to gain work via local and national funding mechanisms

Incentivise innovative models of training either through hybrid online courses, shorter and part time courses or training provision via trade associations
